

# Construction Advisory

## West Montgomery/Anderson Alley Rehabilitation

### Project

#### Description:

Weather permitting; work will begin Monday, March 19, to remove and replace the entrance to the alley on the west side of Laird Street. The asphalt alley entrance will be replaced with a concrete driveway apron. Once the work begins, vehicular access to the alley from Laird Street will be closed for seven days to allow the concrete to cure. During the closure, access to the entire length of the alley will be from Mannakee Street. The bollards located behind 531 West Montgomery Avenue will be temporarily removed and steel plates will be placed over the narrow portion of the pervious concrete alley.

Between Monday, March 19, and Monday, March 26, trash and recycling collection will not be provided within the alley and will only be collected off of the curb along West Montgomery Avenue.

#### Purpose:

The concrete apron is necessary to prevent storm drainage from the reconstructed alley in the 400 block of West Montgomery Avenue from crossing Laird Street and entering the alley in the 500 block of West Montgomery Avenue. In addition, the concrete apron will accommodate the alley crossing for the future sidewalk on the west side of Laird Street from West Montgomery Avenue to Anderson Avenue.

#### Location:

Alley entrance on the west side of Laird Street between 501 West Montgomery Avenue and 10 Laird Street.

#### Timeline:

The work is expected to start Monday, March 19, and be completed within seven days.

#### Cost:

\$5,000
